---

## PROFESSIONAL SUMMARY

Motivated and detail-oriented MSc Computer Science postgraduate with a strong foundation in full-stack web development, data management, and software engineering principles. Proficient in modern technologies including JavaScript, Node.js, Express.js, React.js, MongoDB, and Tailwind CSS. Experienced in designing and developing scalable web applications with RESTful APIs and seamless database integration. Passionate about building efficient, user-centric solutions and continuously exploring emerging technologies in software development and cloud-based systems.

---

## TECHNICAL SKILLS

**Programming Languages:** JavaScript, Python, C, HTML5, CSS3, Java

**Frameworks & Technologies:** Node.js, Express.js, React.js, Tailwind CSS, REST APIs, MongoDB, Mongoose

**Databases:** MongoDB, MySQL

**Data & Analytics Libraries:** Pandas, NumPy, Matplotlib, Seaborn

**Version Control & Tools:** Git, GitHub, VS Code, MS Excel, Postman

**Concepts:** Data Wrangling, Data Preprocessing, Machine Learning Basics, Data Visualization

---

## PROJECT EXPERIENCE

**Expense Tracker** | *Node.js, Express.js, MongoDB, Mongoose, HTML, CSS, JavaScript*

- Designed and developed a full-stack personal finance management application enabling users to log, categorize, and monitor daily expenses.
- Built RESTful APIs using Node.js and Express.js with MongoDB/Mongoose for efficient, schema-driven data persistence.
- Implemented CRUD operations for expense entries with dynamic filtering by category and date range for detailed financial insights.
- Delivered a responsive frontend interface using HTML, CSS, and JavaScript for a seamless cross-device user experience.

**OJT Tracker** | *Node.js, Express.js, MongoDB, Mongoose, HTML, CSS, JavaScript*

- Developed an On-the-Job Training (OJT) tracking platform to monitor and manage student training records and progress.
- Architected the backend using Node.js and Express.js with MongoDB/Mongoose for flexible, scalable data storage.
- Implemented features for recording training milestones, attendance, and performance metrics with structured reporting.
- Built an intuitive frontend interface with HTML, CSS, and JavaScript, enabling efficient tracking for both students and administrators.

**Placement Cell Portal** | *React.js, Tailwind CSS, Node.js, Express.js, MongoDB*

- Developed a full-stack Placement Cell Portal to streamline campus recruitment by connecting students, companies, and administrators on a unified platform.
- Built secure RESTful APIs using Node.js and Express.js with MongoDB to manage user authentication, job postings, student applications, and placement records.
- Implemented JWT-based authentication, role-based access control, and an AI-powered Resume Analyzer that provides ATS scores and personalized resume improvement suggestions.

- Designed a responsive React.js frontend with Tailwind CSS featuring dashboards, job applications, company management, interview scheduling, and placement analytics.
